

I use my XM radio for all my information. It is great for when I travel to let me know the local weather through areas I may travel through, and for traffic. It saves me from going through places that could cause me to be held up. I don't get that from anything else! It is impossible to find a station in the local area; as I'm passing though, to give me this kind of information. XM is awesome, it's with me all the time!!!
